Turn signal problems and diagnosis can get confusing, especially when a system shares wires and connections with the parking, warning, and braking light systems.. Most common problem sources include bulbs, wires, connectors, fuses, flasher units, and switches. So the average car owner can troubleshoot these faults with the use of a test light and, sometimes, a digital multimeter (DMM).

Check the "radio" fuse if your radio acts exactly the same when the ignition switch is turned off. If the clock always shows "12:00", check for an inoperative horn, cigarette lighter, power outlet, or interior lights. If you find something that is dead, check the appropriate fuse. That circuit also feeds the radio's memory circuit.
