**Ford Expedition Engine Light On**  
Check Engine Light Problem on a Ford Expedition, by Jeffrey Caldwell. Vehicles built after 1996 such as the Ford Expedition utilize a system known as On Board Diagnostics (OBD II) to monitor the performance of emissions components. When one of the emissions components fails, it send a trouble code to the engine computer, which in turn sends a signal for the check engine light on the dash to illuminate.

**Check Engine Light Problem on a Ford Expedition | It Still ...**  
All Ford Expeditions use the same computer program and code set to record and diagnose engine malfunctions. This code set is known as OBD-II, or On-Board Diagnostics, Series 2. As the name suggests, the program continually monitors the engine through dozens of sensors to warn the driver if any of them exceed the factory parameters.

**How to Reset a Ford Expedition's Check Engine Soon Light ...**  
Ford Check Engine Light (CEL), also known as service engine soon (SES) warning, will stay on if a problem has been detected by the On-Board Diagnostic System (OBD-II). Under normal operation, Ford check engine light will turn on when you turn on the ignition but should turn off and stay off once you start the engine.

**Troubleshooting Ford Check Engine Light | YOUCANIC**  
A flashing check engine light is your Ford Expedition 's way of saying "I have a serious problem, don't ignore me". Most of the time, that serious problem is a misfire. This flashing light should not be ignored. When your engine is misfiring, it is dumping raw fuel into the exhaust.

Problem Description. Drivers may notice the engine idling roughly, hesitation to accelerate, and even engine stalling on the Ford Expedition with the Triton V8. The mass air flow sensor (MAF) is prone to fail, and commonly is diagnosed as the faulty component when these issues arise. When the Check Engine Light illuminates, and the diagnosis is a failed MAF, it will require replacement to correct the issue.

**Check Engine Light After Hesitation or Stalling : Ford ...**  
A low oil level may cause your check engine light to turn on because driving with a low oil level can cause engine damage. Refer to your vehicle owner's manual to find out how to check the engine oil. You may also like: What's included with a Ford multi-point vehicle inspection? Is it something more serious? If the gas cap and engine oil level are fine, the check engine light could mean a more serious problem, such as: Damaged spark plugs, wires, or coils; Issues with the thermostat
