Students take advantage of the natural ability of red cabbage juice to perform as a pH indicator to test the pH of seven common household liquids. Like environmental engineers working on water remediation or water treatment projects, understanding the chemical properties (including pH) of contaminants is important for safeguarding the health of environmental water sources and systems.

Red Cabbage Chemistry - Activity - TeachEngineering

Food for Thought. If you have already studied about the digestive system you are familiar with the path that food takes through your body. You already understand that food needs to be chewed in order to prepare it for processing by the stomach and how the stomach adds acid and churns food to convert it to a form that can be absorbed into the body through the intestines.

Human Body Worksheets

Chemistry for Biologists About Chemistry for Biologists. Chemistry for Biologists resources aim to help you understand the chemistry and chemical principles that underlie a good deal of biology. These resources were hosted on the Chemistry for Biologists website, which launched in 2004 and was supported by the Royal Society of Chemistry and the Biochemical Society.

Chemistry for Biologists - RSB

(Answers may vary. Encourage students to explain their answers.) Development. In this part of the lesson, students should use the Classify It! app to test their own knowledge about various living organisms and see how they can be classified in many ways.

Classify It! - Science NetLinks

The complete set of DNA in a living organism is called its genome. DNA carries hereditary information between generations. Determining the sequence of bases helps reveal evolutionary relationships. The closest living relative of humans is the chimpanzee (share 98% DNA sequence).
