Microeconomics is a branch of economics that studies the behavior of individuals and firms in making decisions regarding the allocation of scarce resources and the interactions among these individuals and firms.. One goal of microeconomics is to analyze the market mechanisms that establish relative prices among goods and services and allocate limited resources among alternative uses.

Economic analysis of law applies the tools of microeconomic theory to the analysis of legal rules and institutions. Ronald Coase [1960] and Guido Calabresi [1961] are generally identified as the seminal articles but Commons [1924] and Hale [1952] among others had brought economic thinking to the study of law in the 1910s and 1920s.

An aggregate in economics is a summary measure. The aggregation problem is the difficult problem of finding a valid way to treat an empirical or theoretical aggregate as if it reacted like a less-aggregated measure, say, about behavior of an individual agent as described in general microeconomic theory. Examples of aggregates in micro- and macroeconomics relative to less aggregated ...
