Military Aircraft Of The Cold

A military aircraft is any fixed-wing or rotary-wing aircraft that is operated by a legal or insurrectionary armed service of any type. Military aircraft can be either combat or non-combat: Combat aircraft are designed to destroy enemy equipment using their own aircraft ordnance. Combat aircraft are typically developed and procured only by military forces.

Military aircraft - Wikipedia

This is a listing of the nationality markings used by military aircraft of the United States, including those of the U.S. Air Force, U.S. Navy, U.S. Marine Corps, U.S. Coast Guard, U.S. Army and their predecessors. The Civil Air Patrol is also included for the World War II period because it engaged in combat operations (primarily anti-submarine flights) which its July 1946 charter has since ...

United States military aircraft are all given specific designations by the Department of Defense known as MDS designations (Mission Design Series) that identify their design and purpose. This joint designation system was introduced by the Department of Defense in 1962, replacing the separate systems of the US Air Force, US Navy, US Marine Corps, US Army, and US Coast Guard.

How to Understand US Military Aircraft Designations

During the Cold War, both the Soviet Union and the US were in a military race to out-do each other, and military technology developments during that period have outweighed any other in history. It was the constant threat of all-out nuclear devastation that kept both sides driven to develop a weapon or defence system that could attack or protect ...

Best of the Cold War Military Technology

The X-15 was an experimental aircraft which served the needs of both the United States Air Force and NASA. Only three were ever built. This aircraft was operational between 1959 and 1968 and now adorns the National Air and Space Museum in Washington D.C. Let's get to the more interesting parts.
