The Nema 1-15-P is normally referenced as a 2-prong plug that fits into a standard 110 VAC wall outlet. It has two flat blades, just like the NEMA 5-15 plug, but has no ground pin. The female mating outlet for the 1-15-P is called a 1-15-R (R for "receptacle"). Most current versions of this plug have one blade slightly wider than the other.

Power (NEMA and IEC and CEE) Connector Guide | C2G

The NEMA 5-15 receptacle is the most common electrical receptacle in the United States and Canada. It is a two-pole, three-wire grounding receptacle which is used for a maximum of 15A and 125V. The standard wire colors are green for Ground and white for Neutral. The color of the Hot wire can vary depending on

You can use these 15 amp AFCI receptacles on both 15 and 20 amp circuits. Since the 2014 NEC the run between the panel and AFCI receptacle at first box can be NM cable (aka Romex). Prior to the 2014 NEC that part of the circuit had to be either with AC cable, MC cable or in metallic conduit with a metal box at the first receptacle.

Leviton 15 Amp Tamper Resistant AFCI Outlet, White-R32 ...

15 Amp Tamper-Resistant Duplex Outlet, White (10-Pack) Tamper resistant grounded duplex receptacle Tamper resistant grounded duplex receptacle meets the 2008 NEC requirement. Shutter mechanism inside the receptacle blocks access to the contacts unless a 2 prong plug is inserted, helping ensure hairpins, keys, etc., will be locked out.

A: No. The NEMA 6-50 and the NEMA 14-50 are both 50A outlets that charge the car at the same speed. The 6-50 outlet requires two wires plus a ground. The two wires create a 240V circuit. The 14-50 outlet requires three wires plus a ground to meet code. Like the 6-50, two of the wires create a 240V circuit.

The AFCI/GFCI Receptacle can be a great alternative depending on the circumstance. The AFCI/GFCI Receptacle works with any type of wiring and is not dependent on the type of breaker in the panel. It is also easily accessible and has a level of familiarity with users with the TEST and RESET buttons that are also present on a GFCI receptacle.

Dual Function AFCI/GFCI - Leviton

For NEMA frames 56, 143T and 145T the holes for face mounting are 5.875" diameter or 2.94" radius as measured from the center of the shaft. I put this into AutoCAD and made a graphic below showing the center-to-center dimensions which may work better for some people designing a frame to hold a C face motor.
