Postharvest Technology of Horticultural Crops - UC ...

Good management of postharvest operations is a prerequisite for preserving the quality of fresh horticultural products throughout the supply chain from the field to the consumer's table. Rough picking along with careless handling techniques and packing operations are the main causes of injuries and thus loss of produce, especially due to pathogen invasion and decay.

Postharvest Technology of Perishable Horticultural ...

In agriculture, postharvest handling is the stage of crop production immediately following harvest, including cooling, cleaning, sorting and packing. The instant a crop is removed from the ground, or separated from its parent plant, it begins to deteriorate. Postharvest treatment largely determines final quality, whether a crop is sold for fresh consumption, or used as an ingredient in a processed food product.
